📍 Hamburg, Germany

Skills

Frontend Technologies: React, JavaScript, TypeScript, Angular, Angular.js, Webpack, Redux, MobX, CSS, SCSS, PWA, HTML5, JSON, HTTP/AJAX, SaaS platforms, Theia, Node, Vite, WCAG 2.x Accessibility

Testing Frameworks: Jest, Cypress, React Testing Library, Playwright, Jasmin

UI Libraries: Material UI, Bootstrap, Tailwind

DataBases: SQL Server, MongoDB, PostgreSQL, Supabase

Cloud: AWS S3 buckets, EC2, Elastic beanstalk, AWS Amplifier, AWS Lambda, IONOS, Portainer

Other Libraries: Remirror for SVG rendering and markdown content, Instascan.JS for barcode, QR code scanning, GoJs for interactive graphics, React-Leaflet for maps, OSIssoft PI for sensor integrations, AGGrid, React Table, Rechart

API Integration: REST API, GraphQL with Apollo client

Hardware Integrations: Chip based smart cards, Wojtek and RFID integrations

Agile Development & Security: Scrum, Kanban, User Stories, Risk Analysis, Sprint Planning, Project Roadmaps, Daily Standups, Sprint Retrospectives, Stakeholder Communication, OWASP Security Practices

Platforms/Tools: ServiceNow-CreateNow, Git, JIRA, Atlassian, Gitlab, Github, CICD, Docker, Kubernetes

Professional Summary

Lead Frontend Developer with 14+ years of experience in software development, specializing in ReactJS and modern front-end technologies. Proven leadership in team management, project execution, and delivering high-quality web applications on time and within budget. Strong expertise in Agile methodologies, API integration, SaaS platforms, CI/CD, AWS, and quality assurance. Skilled in transforming UI/UX designs into scalable, high-performance applications. Effective communicator with a focus on peer reviews, user story management, and detailed documentation.

Experience

Technical Lead Frontend Development

Enco Software GmbH — May 2023–Present

- Spearheaded ReactJS development with Theia and Material UI, enhancing a SaaS product with AG Grid and extensive testing.
- Led project roadmaps, user stories, and risk mitigation through in-depth analysis.
- Developed interactive IoT graphics using GoJs for cabin environments.
- Optimized performance for HARA, TARA, and ATA modules within the SOX application.
- Automated deployments using CI/CD pipelines on GitLab and IONOS via Portainer.

Senior Frontend Developer

Justtrack (Applike Group) — Nov 2022–Apr 2023

- Delivered new features using ReactJS, Redux, Tanstack Query, and Material UI.
- Improved product stability through E2E testing with Cypress, enhancing overall software quality.

Technical Project Manager

Freelancer — Feb 2020–Sep 2022

- Managed multiple projects, coordinating cross-functional teams across time zones.
- Applied Agile Scrum methodologies with tools like JIRA, driving projects to successful completion.
- Led peer code reviews to improve code quality and foster team knowledge sharing.

Education

Master of Technology in Computer Science, KSOU University, 2013

Bachelor of Computer Engineering, Pune University, 2009

Diploma in Computer Engineering, Maharashtra State Board of Technical Education, 2005

Certifications

70-486: Microsoft Certified Professional Developer - Developing ASP.NET MVC Web Apps

70-564: Microsoft Certified Professional Developer - Designing and Developing ASP.NET Apps

70-562: Microsoft Certified Technology Specialist - ASP.NET Application Development

Visa Status

EU Blue Card

Technology Lead

Infosys — Jan 2019–Dec 2019

- Led Scrum meetings, sprint planning, and retrospectives to maintain project alignment.
- Produced comprehensive documentation, including test cases, RCA, and user guides.

Senior Software Engineer

Sarla Technologies — Aug 2017–Jan 2019

- Delivered clean, maintainable code while managing client communication and deployments.
- Maintained detailed KCD documentation for multiple application modules.

Software Engineer

Larsen & Toubro Infotech — Dec 2013–Aug 2017

- Analyzed data with SQL Profiler to optimize performance.
- Designed and developed service catalogs, streamlining Active Directory workflows.

Software Programmer

Netwin Infosolution — Jul 2011–Nov 2013

- Led .NET application development, deployment on IIS, and backup scheduling.

Software Engineer

United Tectsa — Jan 2011–Jul 2011

- Developed smart card applications and utilities to automate SCOSTA processes.

Software Engineer

Relyon Softech — Oct 2009–Apr 2010

- Created modules and reports for an ERP application in Visual Basic 6.0.
